*Examiner's Amendment*

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

An extension of time under 37 CFR 1.136(a) is required in order to make an examiner's amendment which places this application in condition for allowance. During a telephone conversation conducted on 6/20/2007, the examiner requested an extension of time for 1 MONTH(S) and authorized the Director to charge Deposit Account No. 12-0425 the required fee of \$120 for this extension and authorized the following examiner's amendment. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Clifford Mass on 6/20/2007.

The application has been amended as follows:

IN THE CLAIMS:

- In claim 7, line 1, after the phrase "where the", insert the word --substance--.
- In claims 8, 18, and 19 (line 2 of each claim), replace the term "colorant" with --pigment--.
- Cancel claims 11, 14, 17, and 20.

- In claim 21, line 3, replace the term "he" with --the--.
- In claim 22, line 3, replace the phrase "would result" with the term --results--.

*Statement of Reasons for Allowance*

The present claims are allowable over the closest prior art WO 2001/44384 and EP 676140, either together or taken individually, for the following reasons:

The present claims are drawn to an ink jet recording ink containing water, a colorant comprising a pigment encapsulated by a polymer having a carboxyl group, and 100-800 ppm octylisothiazolone and 10-500 ppm methylisothiazolone, wherein the combined amount of octylisothiazolone and methylisothiazolone is 110-1300 ppm and the ink has a final viscosity after storage in a stoppered vial for 30 days at 70°C that is 1.0-1.2 times greater than viscosity of the ink before storage. A method of improving storage stability is also claimed.

WO 2001/44384 discloses ink jet ink comprising water and microencapsulated pigment coated with carboxyl group-containing polymer, however, it fails to disclose the use of both octylisothiazolone and methylisothiazolone. To make up for this deficiency, EP 676140 was relied upon to teach that a blend of octylisothiazolone and methylisothiazolone provides for improved control against fungi and bacteria, however, EP 676140 discloses amounts both inside and outside the presently claimed ranges. The data in the specification as originally filed, shows criticality for the presently claimed ranges and is a proper comparison to the closest prior art given that composition with 10-500 ppm methylisothiazolone have significantly improved storage stability as presently claimed.

Art Unit: 1714

Thus, it is clear that WO 2001/44384 and EP 676140 do not disclose or suggest the claimed invention.

In light of the above, it is clear that rejections of record are untenable and thus the present claims are passed to issue.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
